

No Dozers, No Piles, No Burning

NATURAL TEXAS TREES UNLIMITED

*--a better way to clear land
and dispose of piles.*

EFFICIENT

ECONOMICAL

**ENVIRONMENTALLY
BENEFICIAL**

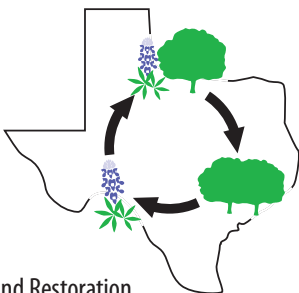

Land clearing by bulldozers can be a long-term proposition, leaving large, unattractive piles lying around for months until dry enough to burn, with more waiting if a burn ban is in effect.

Natural Texas streamlines the land clearing process. We convert brush to mulch in a few hours or days, depending on lot size. Using a steel track skidsteer forestry mower, our process is less disruptive. **Natural Texas** selectively clears unwanted underbrush while keeping desired trees and native plants that dozers could never save. Mulching controls erosion, encouraging proliferation of native plants and wildlife.

Let us help you clear your property the **Natural Texas** way.
